

## BODYPAINING @ ANEBØLLE

The first week of February at Andebølle Ungdomshøjskole was dedicated to a new Art Project: **Body Painting**.

All students were involved in this **experimental project** in which not only "Art and Design" but also "Film and Media" and "Music" classes have participated with enthusiasm and energy.

Bodypainting is an artistic technique in which **the naked human body becomes the canvas** on which the artist paints.

Art and Design students have worked hard to learn how to master the new technique. While they were **painting on the models bodies**, Film and Media class was filming the painting sessions and Music class was working on the soundtrack for the Bodypainting video documentary.

After three days of work, the results were shown to the whole school with a projection of the **documentaries produced by Film and Media team**, combined with the **soundtrack written by Music students**.
